Know About Us.

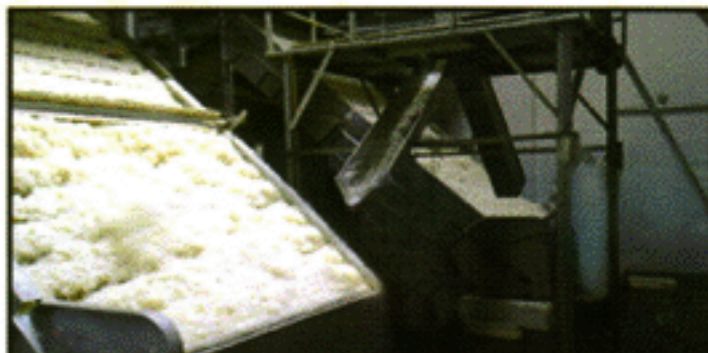

Our Products And Methods.

Shree Ram Exports Was Founded By Mr Bhupatbhai M Patel In 2003 After Having Earned Experience Of Twenty Years In The Field Of Dehydration. Now This Company Is Managed By Him with Active And Dynamic Assistant Of His Son Minesh B Patel. This Father And Son Duo Is Heading towards Progress with motto of " Sky Is A Limit".

The Reason For His Success Is Hidden in Virtue And Policy Of Strict Supervision On Every Stage Of Production. No Complain Policy By Buyer And Quality Control. It Is Their Motto Of "Satisfaction To Buyer" Particularly In Terms Of Quality And Delivery.

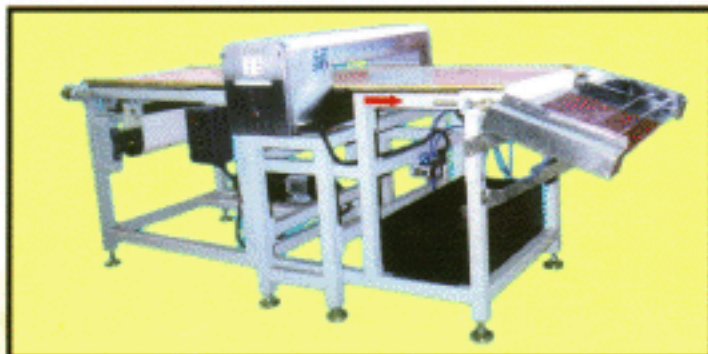

Dryer machine:-

We have three imported continuous dryers with five drying chambers. washed and cut onion is lifted automatically on belt without human touch to drying chamber where it is subjected to the temperature of 60 to 130 degree in different chambers within a four and half hours. And on other side it is collected and tested for moisture content.

Metal detector :-

After it is assorted manually and magnetic separator the dehydrated onion is placed into metal detector having capacity of detecting ferros and non ferros metal with more then 0.5 mm diameter And thus though the ferros impurities are removed in the magnetic separator, the escaped ferros impurity if any is also removed along with the non ferros metallic impurities if any. There after the material is passed on to packing department.

Laboratory.

To get the material in a hygienic condition with proper checking we have established our own laboratory with modern equipments and instruments to examine everyday production for various aspects like Moisture, Ash, So₂, T.P.C., E coil, Coli forms, yeast/mould, Salmonella, staph aureus and B. Cereus and the records are also kept.

Dehydrated white/Red onion sliced

Dehydrated white/Red onion kibbled

Dehydrated white/Red onion chopped minced

Dehydrated white/Red onion granuals
